## **Immature Platelet Fraction**

Order Name: IPF LEVEL
Test Number: 0100475
Revision Date: 10/25/2019

| TEST NAME                  |                                |                              | METHODOLOGY                                      | LOINC CODE            |
|----------------------------|--------------------------------|------------------------------|--|-----------------------|
| Immature Platelet Fraction |                                |                              | Flow cytometry                                   | 71693-6               |
| SPECIMEN REQUIREMENTS      |                                |                              |  |                       |
| Specimen                   | Specimen Volume (min)          | Specimen Type                | Specimen Container                               | Transport Environment |
| Preferred                  | 5 mL (1 mL)                    | Whole Blood                  | EDTA (Lavender Top)                              | Refrigerated          |
| Alternate 1                | 1 mL (0.5 mL)                  | Whole Blood                  | EDTA (Lavender) Microtainer/Bull                 | let Refrigerated      |
| Instructions               | For best results: Room tempera | ature specimens should be te | sted within 24hrs, Refrigerated specimens can be | e tested up to 48hrs. |

| GENERAL INFORMATION |   |  |
|---------------------|---|--|
| Testing Schedule    | Daily   |  |
| Expected TAT        | 1 Day   |  |
| Clinical Use        | Measures immature platelet fraction (IPF) assisting with the diagnosis and treatment of altered platelet and red cell production. |  |
| CPT Code(s)         | 85055   |  |
| Lab Section         | Hematology  |  |
