## Allergic Bronchopulmonary Aspergillosis (ABPA) panel 2

Order Name: ABPA 2
Test Number: 5509225
Revision Date: 02/18/2025

TEST NAME METHODOLOGY LOINC CODE

Allergic Bronchopulmonary Aspergillosis (ABPA) panel 2

SPECIMEN REQUIREMENTS					
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment	
Preferred	1 mL	Serum	Clot Activator SST	Room Temperature	
Instructions	Specimen Type: Gel-barrier tube				
	Specimen Storage: Maintain specimen at room temperature				
	Specimen Collection: Not Available				
	Special Instructions: Testing referred to Eurofins Viracor LLC EURKS#403016				

GENERAL INFORMATION		
Expected TAT	3-5 business days from receipt of specimen at performing lab	
Clinical Use	ABPA is a hypersensitivty disease of the lungs caused by Aspergillus fumigatus. It is an important complication for patients with asthma and cystic fibrosis. The ABPA 2 panel is the same as the basic ABPA panel with the addition of Aspergillus Precipitins. Recent reports have emphasized the importance of both the precipitin and quantitative IgG test for Aspergillus-specific antibodies.
