PHOMA IGG

Order Name: PHOMA IGG
Test Number: 5500451
Revision Date: 12/14/2022

TEST NAME			METHODOLOGY	LOINC CODE	
PHOMA IGG			Enzyme immunoassay (EIA)		
SPECIMEN REQU	UREMENTS				
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment	
Preferred	0.3 mL (0.1 mL)	Serum	Clot Activator SST	Room Temperature	
Instructions	Specimen Type: Red-top tube Specimen Storage: Room tel Specimen Collection: Not Av Special Instructions: Values	mperature vailable	ethods should not be used interchangeably	in serial testing. It is recommended that only	
	one assay method be used consistently to monitor each patient's course of therapy.				

Specimen Stability: Ambient: Not Available, Refrigerated : Not Available, Frozen: Not Available

GENERAL INFORMATION			
Expected TAT	2 - 4 days		
Clinical Use	Although there have been many publications concerning the measurement of allergen-specific IgG, the clinical utility of such tests has not been established except in special situations. Thus, the quantitative IgG test should only be ordered by specialists who recognize the limitations of the test. The normal reference ranges reported represent the expected results for individuals who have no unusual exposure and have not been immunized with the indicated allergen. The ranges reported have no disease-associated significance.		
Performing Labcorp Test Code	605226		
Notes	Labcorp Test Code: 605226		
CPT Code(s)	86001		
Lab Section	Reference Lab
