## Phenol, Urine

Order Name: PHENOL U
Test Number: 6905107
Revision Date: 12/12/2022

| TEST NAME                           | METHODOLOGY                                 | LOINC CODE |
|-------------------------------------|---|------------|
| Creatinine                          | Quantitative Gas Chromatography/Colorimetry | 2161-8     |
| Phenol, Total, Urine                |   |            |
| Phenol-Total (Creatinine Corrected) | Quantitative Gas Chromatography/Colorimetry |            |

| SPECIMEN REQUIREMENTS |  |               |                         |                       |  |
|-----------------------|--|---------------|-------------------------|-----------------------|--|
| Specimen              | Specimen Volume (min)  | Specimen Type | Specimen Container      | Transport Environment |  |
| Preferred             | 4 mL (1.9 mL)  | Urine, Random | Sterile Urine container | Refrigerated          |  |
| Instructions          | Collect random urine at end of work shift.  Specimen Type: Plastic urine container without preservative  Special Instructions: Testing referred to MEDTOX Laboratories Inc TC 70232  Specimen Stability: Ambient: 4 days; Refrigerated: 1 week; Frozen: 3 months |               |                         |                       |  |

| GENERAL INFORMATION             |                           |  |
|---------------------------------|---------------------------|--|
| Testing Schedule                | Varies                    |  |
| Expected TAT                    | 5-12 days                 |  |
| Performing Labcorp Test<br>Code | 723200                    |  |
| Notes                           | Labcorp Test Code: 723200 |  |
| CPT Code(s)                     | 84600, 82570              |  |
| Lab Section                     | Reference Lab             |  |
